Abiyoga Wahyu Pratama

has successfully completed the online, non-credit Specialization

Technology Entrepreneurship

A new paradigm in entrepreneurship has replaced the iconic model of the Silicon Valley startup garage and bricks-and-mortar approach with laptop computers and distributed networks. In this new paradigm, founders, partners, and critical startup resources may be accessed and acquired virtually anywhere anytime. New technology products and services can be readily deployed to customers, markets, and distribution channels across local and global scales with the same core infrastructure and underlying entrepreneurial principles and practices. Technology Entrepreneurship will empower learners with the knowledge, skills, and methods needed to effectively create and launch a new technology company and to successfully compete in this new paradigm.
